

Hardware Safety

- Early Failure
- Design Flaws
- Avoid → eg. Tech, Reviews
- Random
- "Normal" losses
- Part selection, Architecture (eg. redundancy, DC)
- Late Failure, after lifetime
- Wearoff
- Part, technology

$$FIT_{\text{Sensor}} + FIT_{\text{con}} + FIT_{\text{MCU}} + FIT_{\text{con}} + FIT_{\text{Actor}}$$

//

$$FIT_{\text{channel}} = 1 - (1 - FIT_{\text{Sensor}}) \times (1 - FIT_{\text{con}}) \dots$$
